Dear Colleague:

The Southeast is experiencing one of the most serious droughts in history, and the stress on available sources of water supply has been felt throughout the region.

Join our distinguished faculty for a discussion of what can be done to better secure water supply in the Southeast.

Understanding the nexus between development and water supply in today's context is critical as you seek to protect your interests or those of the clients you represent.

At this Conference, you'll hear from the leaders and innovators in water law and planning, and get the tools you need to deal with the complex issues you face throughout the year. Plus, you'll have the opportunity to network with other attendees facing the same issues.

Whether you are a professional in the legal, governmental, development, engineering, planning, water supply or environmental community, you'll gain valuable insights from attending this Conference.

Please join us—we hope to you there!

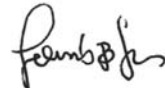

Sincerely,

Patricia T. Barmeyer, Esq.
Program Co-Chair

meet your **instructors**

Program Chairs

Patricia T. Barmeyer is the head of her firm's Environmental Practice Group. She joined the firm in 1990 after serving 17 years as an Assistant Attorney General for the State of Georgia.

Doug Baughman specializes in water resource planning, permitting, and environmental impact assessment. He has worked extensively on water resource issues in Georgia for the last 15 years.

Lewis B. Jones concentrates on water law and water resources, and has extensive experience with the Endangered Species Act and wetlands permitting issues.

Todd Barnes underwrites municipal bonds for local governments in Georgia and surrounding states, with particular emphasis on water and sewer, education and public facility issues.

James L. Bross teaches property, land use, water rights and natural resources law. His research focuses on the nexus between land use and natural resources.

Edward D. Bruce has been with his company for 28 years. He is currently responsible for water quantity and economic analysis relicensing issues.

Nap Caldwell has spent the past several years helping to guide development of Georgia's first comprehensive water management plan.

William Bradley Carver focuses his practice on energy, utilities, environmental, economic development and local government law. He also specializes in Clean Water Act issues.

Steven R. Cone served for over 32 years with the Corps, and is currently working part-time as a rehired annuitant with the Corps Institute for Water Resources.

William Thomas Craig focuses his practice on a broad range of water-related issues.

Mary Davis works to bring hydrologic and geomorphic expertise to 10 state programs and build capacity among regional aquatic staff.

Linda DiSantis has significant legal, environmental, compliance, ethics, and management experience. She previously served as City Attorney of Atlanta.

Charles T. DuMars practices natural resource law in New Mexico, as well as in other states and internationally.

Arthur B. "Skin" Edge IV served in the Georgia State Senate for 10 years. He was named by *Georgia Trend Magazine* as one of "The 100 Most Influential People in Georgia."

David Ellis has served over 17 years as an executive with local building industry organizations.

Noah D. Hall teaches environmental and water law, and focuses his research on environmental governance, federalism, transboundary pollution and resource management.

William A. Holby focuses on municipal finance transactions. He represents governmental issuers, as well as for-profit and nonprofit organizations, with their tax-exempt financing needs.

Stuart Jeffcoat is a recognized expert in water treatment with over 10 years of experience in addressing water supply challenges through the design and implementation of various treatment processes.

Gregory R. Mason is part of a leadership team overseeing multi-million dollar loan and grant agreements with local governments and nonprofit organizations for environmental improvements.

James L. Noles Jr. has devoted his practice to issues of environmental law, regulation, and litigation in Alabama.

Harold F. Reheis is a specialist in governmental and regulatory affairs and is nationally known for his expertise in environmental protection matters.

Daniel P. Sheer has done pioneering work in the development of water resources modeling technology and the use of Computer Aided Negotiation and Operations Exercises.

R. Todd Silliman practices environmental law. He concentrates on advising and representing clients in regulatory matters, environmental litigation and transactions involving commercial real estate.

Frank Stephens has worked for the last 24 years in municipal water and sewer operations in Arkansas, Colorado, and Georgia.

Pat Stevens is responsible for directing her agency's planning efforts in the areas of water supply and water quality.

David E. Stooksbury is a member of the Meteorological Standards Committee of the American Wind Energy Association and Treasurer of the American Association of State Climatologists.
